Princeton Garden Project
at Forbes College
OPEN HOURS!

Join us at 79 Alexander St
(or type Princeton Garden Project in Google Maps)

Tuesday 3:30-5:30 PM
Friday 3:30-5:30 PM
Sunday 10AM-1 PM

Take a break from your classes to volunteer at the garden! We are a student-run, organic garden growing all types of produce (peppers, lettuce, tomatoes, beets, peas, carrots, etc.). Whether you're a seasoned gardener or just looking to spend time outdoors, you are welcome!

Assistant Vice President
Environmental Health and Safety

Sa[Fest] Spring Event - Celebrate Earth Month

Icahn Laboratory

Wednesday, April 17th, 2:30 - 5:00 PM

The spring 2024 installment of EHS' Sa[Fest] series of lab safety events highlights sustainable practices in the lab. It will feature a talk from John Pickering of behavioral sciences firm Evidn, who is working with EHS and the Office of Sustainability to implement practices around more efficient use of fume hoods.

Princeton Plasma Innovation Center receives funds for early construction activities and energy conservation

By: Jeanne Jackson DeVoe, Princeton Plasma Physics Laboratory

The Princeton Plasma Physics Laboratory's (PPPL) plans to construct a state-of-the-art building, the Princeton Plasma Innovation Center (PPIC), are moving forward. PPPL recently received permission to use \$10 million in funding from Princeton University to prepare the site and received a \$2.3 million grant from the U.S. Department of Energy (DOE) for geothermal wells.

When it is completed in 2027, the \$109.7 million PPIC project will provide new laboratory and office space at a crucial time for PPPL as the Laboratory is expanding its research mission and increasing its staff. PPIC will be the first new building in several decades and will replace two aging buildings: the Theory Wing, which has housed theoretical physicists for five decades, and part of the Administration Wing. PPPL plans to break ground on the new building as early as the summer of 2024.

“PPIC will not only be a beautiful gateway into our national Laboratory, but it will also be a sustainable building,” said Steve Cowley, PPPL director. “Sustainability is at the heart of our mission to achieve fusion energy as a clean, safe and virtually limitless source of energy. PPIC will provide space for our fusion energy research and for research into plasma science applications in microelectronics, quantum computing, and sustainable technologies.”...[Read More](#)

Our Community

Say hello to

Christiana

I am very spiritual & love nature.
I believe in understanding that you are part of something bigger than yourself and the need to treat others as equals.

I enjoy singing, cooking & meditating.

I love interacting with the students.
Dancing with the students at Studio 34. Helping with move-in. Making sure students have access to quality food. When everyone interacts and works well together, the campus is even better.

To me, students' respect is key.
I have not met a disrespectful student, they're always willing to help.
